#### **DETAILED ACTION**

### Claim Objections

Claim 6 is objected to because of the following informalities: in line 4, "portions" should be corrected as – portion --. Appropriate correction is required.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6-11, 14 and 16 rejected under 35 U.S.C. 103(a) as being unpatentable over Hagen et al. [6424722].

Hagen et al. disclose an apparatus [40] for adding functionality to a portable electronic device [10] comprising: a housing [figure 1] to be accepted by a housing port [18] of a portable electronic device [10], the housing having an interior portion; and a hardware interface connector [column 7, lines 58-65] positioned within the interior portion of the housing to be accepted by a hardware interface port of the portable device.

Hagen et al. disclose the instant claimed invention except for the specific number of pins used on the interface connector and their specific arrangement.

It would have been obvious to a person having ordinary skill in the art at the time invention was made that the number of pins used and their specific arrangement would have been an obvious design consideration based on the specific device intended to be connected to the adapter to be connected to the portable electronic device.

The specific method steps claimed would have been necessitated by the product structure.

### Response to Arguments

Applicant's arguments with respect to claims 6-11 and 14 have been considered but are most in view of the new ground(s) of rejection.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rasmussen [5373149]; Klatt et al. [6176724] and Pinnavaia [5061845].
